

**gesis®** NRG

**Flat cable system**  
2 pole, 5 pole, and 5+2 pole

**Docking whenever, wherever**

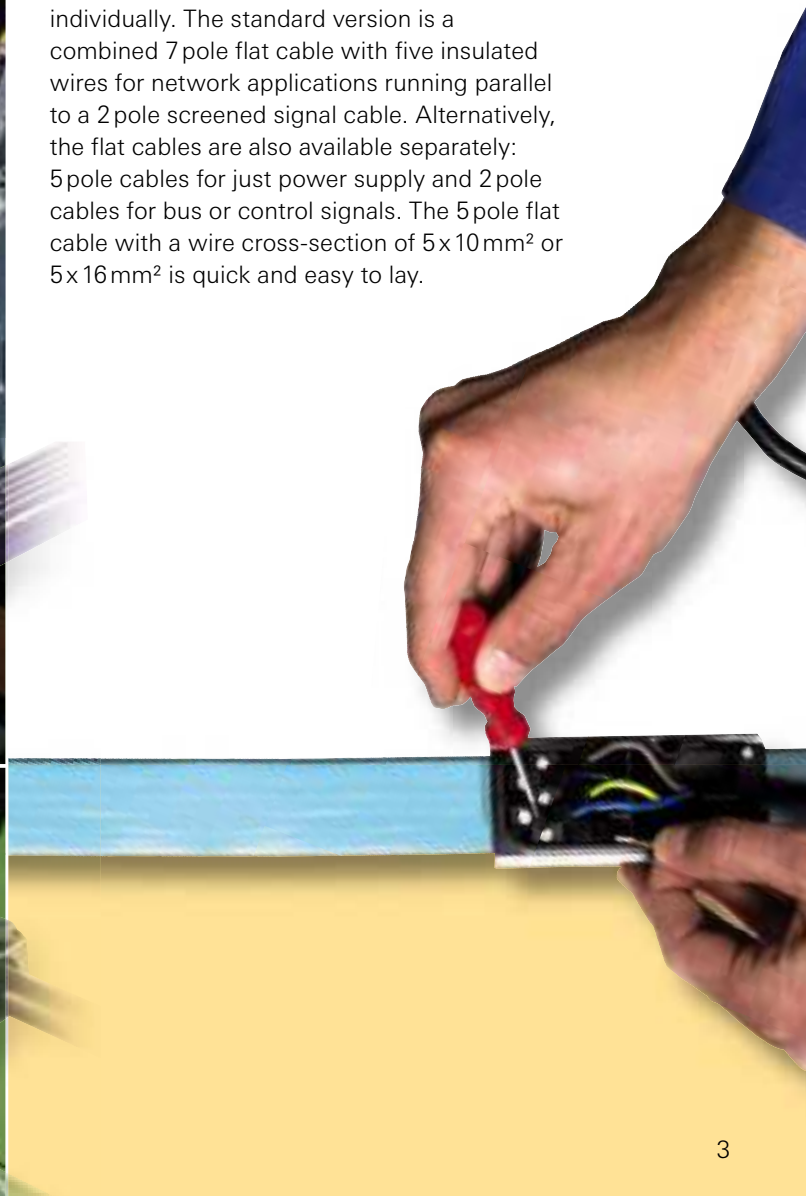

## Anywhere where energy is needed Flexible contact without cutting the cable!

The flexible busbar **gesis** NRG functions as a central supply cable for efficient installations. Contacts are made by means of insulation-piercing connection technology using V screws and are possible in any position along the main line. This means that transfer to the desired **gesis** product line is achieved without having to cut the cable.

The main advantage is its flexibility: unlike rigid busbars, the flat cable can be installed conveniently in cable ducts and adapts optimally to the structural conditions on site. Once inserted, the branches can be set exactly where they are needed – without line interruption.

With different pole number options for the flat cables, you can plan your applications individually. The standard version is a combined 7 pole flat cable with five insulated wires for network applications running parallel to a 2 pole screened signal cable. Alternatively, the flat cables are also available separately: 5 pole cables for just power supply and 2 pole cables for bus or control signals. The 5 pole flat cable with a wire cross-section of 5 x 10 mm<sup>2</sup> or 5 x 16 mm<sup>2</sup> is quick and easy to lay.

## Branches precisely where they are needed – without cutting the cable

### Application example

### General

Choosing a flat cable system gives you all the benefits of a modern electrical installation.

Once the flat cable has been installed, you can position branches exactly where you need them, quickly and safely – without cutting the cable!

This means that modifications or extensions can be made particularly quickly and cost-effectively.

The pluggable flat cable adapters can be used for input and output and are available in two different mechanical codings. Direct routing to the consumer is done with connectors of the chosen line and coding. Mechanical coding means that only matching plug-socket pairs with the same code can be used, and with the correct polarity. This gives you the security of a clear distinction between different applications – without any reworking required due to incorrect connections. The color of the connectors indicates the relevant links.

### Coding

| Name                                    | Description  | Direct routing with line components | Connection technology                         | Strain relief housing | Connections per pole | Mechanical coding       | Application   | Color             |

Please see the first pages of the Technical Data section for a table of the approximated relation between the conductor cross sections and the AWG sizes; for packaging units please refer to price list and e-CAT.

# Flat cable adapter for direct routing BST 14i2/i3, 0.5 mm<sup>2</sup>

**Flat cable adapter for BST 14i2  
KNX bus**

| Name                               | Color | Part no.      |
|------------------------------------|-------|---------------|
| <b>Flat cable adapter BST 14i2</b> | green | 93.421.0953.0 |

Supplied without cable.

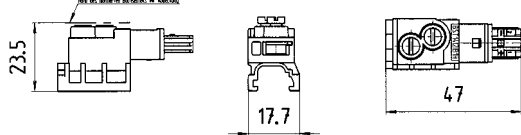

| <b>Flat cable adapter for KNX bus, 2 pole</b> |                     |
|---|---------------------|
| Connection technology                         | insulation piercing |
| Tapping                                       | 2 pole bus signal   |
| Connection cable direction                    | parallel to line    |
| Female connector                              | BST 14i2            |
| Output, input                                 | with male connector |

**Flat cable adapter for BST 14i3  
for control signals**

Screen tapping not provided.  
The third pole of the connector thus remains free.

| Name                               | Tapping outside conductor | Part no.      |

## Branches precisely where they are needed – without cutting the cable

### Application example

### General

Choosing a flat cable system gives you all the benefits of a modern electrical installation. Once the flat cable has been installed, you can position branches exactly where you need them, quickly and safely – without cutting the cable! This means that modifications or extensions can be made particularly quickly and cost-effectively. The flat cable adapter comes in three versions: an incoming supply adapter for connecting to the flat cable as well as pluggable outgoing adapters as 5 pole and 3 pole models.

With **gesis** NRG, contact with the wires is achieved by screwing in special V screws that pierce the cable sheathing. The flat cable system allows an installation to be subdivided into individual sections, resulting in a flexible, transparent, and maintenance-friendly installation. Unlike rigid busbar systems, the flat cable can be laid conveniently in cable ducts.

### Coding

| Name                | Description   | Direct routing with line components | Connection technology                         | Strain relief housing | Connections per pole | Mechanical coding | Color                      |  |

# Power supply and signal section together in one combination cable

## Application example

Direct routing to the consumer is done with connectors of the chosen line and coding. Mechanical coding means that within a product line only matching plug-socket pairs with the same code can be used, and with the correct polarity. This gives you the security of a clear distinction between different applications – without any reworking required due to incorrect connections.

## General

Choosing a flat cable system gives you all the benefits of a modern electrical installation.

Once the flat cable has been installed, you can position branches exactly where you need them, quickly and safely – without cutting the cable! This means that modifications or extensions can be made particularly quickly and cost-effectively.

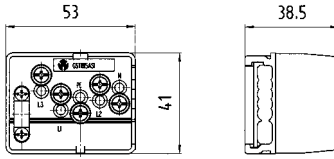

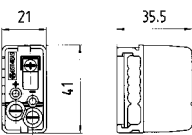

The 5+2 pole flat cable brings together the power supply and the signal section in one combination cable. This type of connection has proven extremely advantageous in many applications, with only one cable having to be laid. The power and signal sections have separate infeed boxes, which supply the flat cable via a screw connection. The pluggable flat cable adapters provide an output function and therefore act as the transition to the chosen product line. Depending on requirements, this may be the GST 18i3 line (power 3 pole, L1, L2, L3), the GST 18i5 line (power 5 pole) or the BST 14i2/3 line (KNX bus/control signals).

## Coding

| Name                              | Description   | Direct routing with line components | Connection technology                         | Strain relief housing | Connections per pole | Mechanical coding   | Color                 |

# Definition of our numerical codes

## A logical structure makes ordering easy

Our numerical code saves time and effort when ordering our components. Your needs can be compiled quickly and efficiently, particularly in eCat, but also using conventional means. The way it works is simple and refers to our part numbers, which have a consistent structure. Your product can be ordered in just a few steps.

Example: **92.232.3000.1**, power cable 3 G 1.5 mm<sup>2</sup>, length: 3.0 m, cable PVC H05VV  
Male – female design, code 1 (power, black)

|  |                                  |            |             |           |          |           |          |

## Conductor cross sections / AWG

The approximated relation between the conductor cross sections in mm<sup>2</sup> and the AWG sizes are defined as follows:

| AWG | Cross section mm <sup>2</sup> | Metric equivalent mm <sup>2</sup> |
|-----|-------------------------------|-----------------------------------|
| 22  | 0.32                          | 0.34                              |
| 20  | 0.52                          | 0.75                              |
| 18  | 0.82                          | 1.0                               |
| 16  | 1.31                          | 1.5                               |
| 14  | 2.08                          | 2.5                               |
| 12  | 3.31                          | 4.0                               |
| 10  | 5.26                          | 6.0                               |
| 8   | 8.37                          | 10.0                              |
| 6   | 13.3                          | 16.0                              |

# Installation instructions

## Flat cable system 2 pole, 5 pole, and 5+2 pole

1. When connecting flat cable adapters for mains and KNX/control signal, note the latching side (3 pole on the left, 5 pole on the right). Latch the components together. Place the terminal block on the flat cable – note the coding on the cable!
2. Slide the base plate on – **note the coding on the terminal block and cable** (see diagram on the left)! The flat cable grooves on the terminal block as well as on the base plate indicate the correct position of the adapter on the cable – if the adapter is not positioned correctly, a great deal of force is required to slide the base plate on. The unit must then be rotated 180 degrees.
3. Turn the slotted screws as far as possible in the flat cable –  
Mains: torque 0.7 Nm.  
Bus: torque 1.0 Nm.
4. Place the cover(s) on top..

Flat cable system 5 pole

Flat cable system 5+2 pole

#### Additional information:

- When snapping on connectors use a locking device.
- To remove the cover, insert a screwdriver into the slot provided and raise gently.
- **The ends of the flat cable must be terminated with the cable end cap.**  
This guarantees the necessary insulation between bus and power conductors.
- After removing the adapters, the sections of cable that have been terminated with the slotted screws must be sealed with insulating tape.
- Caution: Do not ground the screen!
- Functional capability can only be guaranteed if the original flat cable is used.

C, CENELEC HD 405.3<br>– Minimal smoke development according to EN 50268, DIN VDE 0482 part 268, IEC 61034<br>– Self-extinguishing according to DIN EN 50265-2-1, VDE 0482 part 265-2-1 (was CENELEC HD 405.1 and DIN VDE 0472 part 804 B), IEC 60332-1 |
| Note:                        | Functional safety can only be guaranteed, if the original cable is used.   |

### Flat cable, PVC

Number x cross section: 5 x 16 mm<sup>2</sup>  
 Outer sheath: Insulation: PVC, "TI3" according to CENELEC HD 21.1 S4  
 Sheath: PVC, "DMV6" according to DIN VDE 0276-603 (VDE 0276 part 603): 2000-5 contains CENELEC HD 603 S1 + A1, oil resistance as "TM5" according to CENELEC HD 21.1 S4

Weight: 1255 kg/km  
 Dimensions (WxH): 48.6 x 11.3 mm  
 Fire load: 2.88 kWh/m  
 Fire behavior: Self-extinguishing according to IEC 60332-1, DIN EN 50265-2-1 (DIN VDE 0482 Part 265-2-1) (was CENELEC HD 405.1)

Bending radius: min. 100 mm (with fixed installation according to DIN VDE 0298-3)

#### Structure:

Copper wire: uncoated, fine-stranded according to CENELEC HD 383 S2 Class 6  
 Wire insulation: PVC according to CENELEC HD 21.1 S2, TI2  
 Wire colors\*: brown, blue, green-yellow, black, gray

#### Technical data:

Cross section: 16 mm<sup>2</sup>  
 Testing voltage: 4 kV  
 Rated voltage: 0.6 / 1 kV  
 Printing: 5 G 16 MM<sup>2</sup>, 1KV, VDE REG-NR. 9475

### Flat cable, halogen-free

Number x cross section: 5 x 16 mm<sup>2</sup>  
 Outer sheath: Insulation: Cross-linked, halogen-free, flame-retardant PE according to DIN VDE 0207 part 22 "2X11" and following IEC 60502-1 "XLPE"  
 Sheath: Thermoplastic and halogen-free compound according to DIN VDE 250 Part 214 "HM2"

Weight: 1266kg/km  
 Dimensions (WxH): 48.6 x 11.3 mm  
 Fire load: 2.48 kWh/m  
 Fire behavior: Self-extinguishing according to IEC 60332.1. Low smoke emission according to IEC 61034-1/2  
 Bending radius: min. 100 mm (with fixed installation according to DIN VDE 0298-3)

#### Structure:

Copper wire: Cu uncoated, fine-stranded according to DIN VDE 0295 Class 5 CENELEC HD 383 S2 Class 5 and IEC 60228 Class 5  
 Wire insulation: cross-linked, halogen-free and flame-retardant PE  
 Wire colors\*: brown, blue, green-yellow, black, gray

#### Technical data:

Cross section: 16 mm<sup>2</sup>  
 Testing voltage: 4 kV  
 Rated voltage: 0.6 / 1 kV  
 Printing: 5 G 16 MM<sup>2</sup>, FR/LSOH, 1KV, VDE REG-NR. 9480

\* The wire colors have been adjusted to the new European standard HD 208 S2. Assignment according to international recommendations.

# Technical data

## Flat cable system 5 pole + 2 pole

### Components:

#### Mains

Supply adapter for round cables 5 x 2.5 mm<sup>2</sup>  
 Flat cable adapter GST 18i5  
 Flat cable adapter GST 18i3

#### Bus

Supply adapter for round cables 5 x 1.5 mm<sup>2</sup>  
 Flat cable adapter BST 14i2  
 Flat cable adapter BST 14i3

General: **Use connectors (bus signal) only in connection with a SELV or PELV voltage supply! When using an ELV voltage supply for BST14, it has to be galvanically insulated (e.g. via transformer) and feature a base insulation.**

The voltage (supply) is fed to the flat cable with a screwable flat cable adapter.  
 The output boxes can be adapted using insulation piercing screw technology.  
 The outputs are pluggable with **gesis** connector systems.  
 The connectors have to be locked together with the adapter.  
 Use the according GST accessories for this purpose.

Note: Functional safety can only be guaranteed, if the original cable is used.  
 The 5+2 pole flat cable is not designed for use with dimming applications.

\* The wire colors have been adjusted to the new European standard HD 208 S2.  
 Assignment according to international recommendations.

## Our subsidiaries

... and the addresses of our representations worldwide are available at:

[www.wieland-electric.com](http://www.wieland-electric.com)

### USA

**Wieland Electric Inc.**  
49 International Road  
Burgaw, N.C. 28425  
Phone +1 910 2595050  
Fax +1 910 2593691  
sales@wielandinc.com

### CANADA

**Wieland Electric Inc.**  
2889 Brighton Road  
Oakville, Ontario L6H 6C9  
Phone +1 905 8298414  
Fax +1 905 8298413  
info@wieland-electric.ca

### GREAT BRITAIN

**Wieland Electric Ltd.**  
Riverside Business Centre,  
Walnut Tree Close  
GB-Guildford /Surrey GU1 4UG  
Phone +44 1483 531213  
Fax +44 1483 505029  
sales@wieland.co.uk

### FRANCE

**Wieland Electric S.A.R.L.**  
Le Céramê Hall 6  
47, avenue des Genottes  
CS 48313  
95803 Cergy-Pontoise Cedex  
Phone +33 1 30320707  
Fax +33 1 30320714  
infos@wieland-electric.fr

### SPAIN

**Wieland Electric S.L.**  
C/ Maria Auxiliadora 2 bajos  
E-08017 Barcelona  
Phone +34 93 2523820  
Fax +34 93 2523825  
ventas@wieland-electric.com

### ITALY

**Wieland Electric S.r.l.**  
Via Edison, 209  
I-20019 Settimo Milanese  
Phone +39 02 48916357  
Fax +39 02 48 920685  
info@wieland-electric.it

### POLAND

**Wieland Electric Sp. Zo.o.**  
Św. Antoniego 8  
62-080 Swadzim  
Phone +48 61 2225400  
Fax +48 61 8407166  
office@wieland-electric.pl

### CHINA

**Wieland Electric Trading**  
Unit 2703  
International Soho City  
889 Renmin Rd., Huang Pu District  
PRC- Shanghai 200010  
Phone +86 21 63555833  
Fax +86 21 63550090  
info-shanghai@wieland-electric.cn

### CZECH REPUBLIC

(Production)  
**Wieland Electric s.r.o.**  
Nadražni 1557  
356 01 Sokolov  
Phone +420 352 302011  
Fax +420 352 302027

### DENMARK

**Wieland Electric A/S**  
Vallørækken 26  
DK-4600 Køge  
Phone +45 70 266635  
Fax +45 70 266637  
sales@wieland-electric.dk

## Industrial technology

### Solutions for the control cabinet

- DIN rail terminal blocks
  - Screw, tension spring or push-in connection technology
  - Wire cross sections up to 240mm<sup>2</sup>
  - Numerous special functions
  - Software solutions interfacing to CAE systems
- Safety
  - Safe signal acquisition
  - Safety switching devices
  - Modular safety modules
  - Compact safety controllers
  - Applicative consultancy and training
- Network engineering and fieldbus systems
  - Remote maintenance via VPN industrial router and VPN service portal
  - Industrial Ethernet switches
  - PLC and I/O systems, standard and increased environmental conditions
- Interface
  - Power supply units
  - Overvoltage protection
  - Coupling relays, semiconductor switches
  - Timer relays, measuring and monitoring relays
  - Analog coupling and converter modules
  - Passive interfaces

### Solutions for field applications

- Decentralized installation and automation technology
  - Electrical installation for wind tower
  - Fieldbus interfaces and motor starters
- Connectors for industrial applications
  - Rectangular and round connectors
  - Aluminum or plastic housings
  - Degree of protection up to IP68
  - Current-carrying capacity up to 100 A
  - Connectors for hazardous areas
  - Modular, application-specific technology

### PC board terminals and connectors

- Screw or spring clamp connection technology
- Spacings: 3.5 mm to 10.16 mm
- Reflow or wave soldering process

## Building and installation technology

- Building installation systems
  - Main power supply connectors IP20/IP65 ... IP68
  - Bus connectors
  - Low-voltage connectors
  - Power distribution system with fl at cables
  - Distribution systems
  - Bus systems in KNX, LON and radio technology
  - DIN rail terminal blocks for electrical installations
  - Overvoltage protection

contacts  
are  
green.
